SUMMARY

Results-oriented Full Stack Developer with 3+ years of remote experience building scalable web applications using React, Next.js, and Python (Flask). Proven track record of optimizing backend performance and driving user engagement for US-based clients. Adept at transforming Figma designs into production-ready code with high fidelity. Seeking to leverage technical expertise in a challenging environment.

EXPERIENCE

LaunchEffect

Jan 2023 – Jan 2024

Web developer - US - (Full Remote)

- Collaborated with cross-functional teams to optimize backend APIs in Flask and align front end deliverables, improving system scalability and maintainability.
- Implemented automation workflows with N8N and integrated Gemini AI for intelligent data processing, boosting operational efficiency by 20%.
- Enhanced user engagement by incorporating Lottie animations across multiple projects, improving retention rates and modernizing UI experiences.
- Transformed 8 complex Figma wireframes into production-ready solutions with 100% design fidelity, consistently delivering projects 15% ahead of schedule.
- Developed 12+ responsive web applications using React, Next.js, TypeScript, Supabase, and Svelte, achieving 98% design accuracy from Figma handoffs and driving a 25% increase in mobile user engagement.
- Led migration of 5 high-traffic websites from ThemeForest templates to Python Flask, cutting average page load times by 40% and reducing annual maintenance costs by 30%.

Tajdeed.io

May 2024– Dec 2024

Full Stack Developer - US - (Remote)

- Architected and maintained 3 SvelteKit applications integrated with Node.js and Stripe, automating invoice processing and saving 15+ hours per week in manual accounting tasks.
- Implemented Firebase + Google Cloud infrastructure, cutting hosting costs by 25% while improving application reliability to 99.9% uptime.
- Built 10+ serverless backend functions on Firebase that processed 50,000+ monthly transactions with 99.8% reliability, eliminating critical data bottlenecks.
- Developed a Progressive Web App with Next.js + TypeScript, increasing mobile conversions by 32% and reducing customer support tickets by 40%.
- Collaborated with a 6-person team, driving 25% faster sprint velocity through improved resource allocation and sprint planning.

Upwork, Inc

December 2021 – June 2023

Freelance Software Developer - (Remote)

- Delivered full-stack applications with Next.js, TypeScript, React Context/Redux, scaling to 10,000+ daily users with zero downtime during peak loads.
- Integrated Firebase + Node.js backend services with Stripe payment workflows, enabling \$250K+ in monthly transactions with a 99.9% success rate.
- Architected scalable React frontends with TypeScript, supporting 3x user growth without performance degradation.
- Partnered with global clients to transform Figma wireframes into production-ready web apps, achieving 100% design fidelity and early delivery by 15% on average.

EDUCATION

Ecole Supérieure de Technologie

June 2021

Diplôme Universitaire de Technologie – Génie Informatique

TECHNICAL SKILLS

Programming Languages: Python, JavaScript (ES6+), TypeScript, Java, SQL

Frameworks & Libraries: React.js, Next.js, SvelteKit, Node.js, Flask, Express.js, Redux, Tailwind CSS

Databases & Backend: Supabase, PostgreSQL, Firebase, Google Cloud Firestore, Stripe API

Tools & Platforms: N8N, Gemini AI, Docker, Git, GitHub Actions, AWS (Lambda, S3, EC2), Vercel, Netlify

Concepts: RESTful APIs, Microservices Architecture, Serverless Functions, CI/CD, Authentication & Authorization, Agile/Scrum, Test-Driven Development
